KISHORE GOUTHAM

JAVA DEVELOPER

Phone: 9976474297   **Email :** kishoregoutham051@gmail.com

EDUCATION

2018 - 2022

Velammal Engineering College

Bachelor of Engineering

ORGANIZATION

Nov 2022 - Jun 2024

HCL

Chennai

SKILLS

- **Java**
- **HTML**
- **CSS**
- **Javascript**
- **Springboot**
- **PostgreSQL**
- **Hibernate**
- **React.js**
- **MySQL**
- **Git**

PERSONAL PROFILE

As a Java Full Stack Developer with 1.7 years of experience, I specialize in building scalable, robust software solutions. I'm eager to further enhance my skills while contributing to the success of a dynamic, growth-oriented organization.

PROFESSIONAL SUMMARY

- As a Java Developer with **1.7 years** of experience, I have contributed to designing, developing, and maintaining web applications and systems.
- Developed and maintained web applications using Java, Spring Boot, Hibernate and React.js.
- Designed responsive front-end interfaces with HTML, CSS, JavaScript, and React.js for seamless user experiences.
- Integrated PostgreSQL and MySQL databases, optimizing queries and stored procedures.
- Developed RESTful APIs for smooth communication between front-end and back-end services.
- Collaborated in Agile teams, participating in sprint planning and code reviews.
- Used Git for version control and efficient code collaboration.
- Troubleshot performance issues, optimized queries, and ensured application responsiveness.
- Implemented security protocols (authentication, authorization, encryption) to ensure data integrity.

PROJECTS INVOLVED

99designs | E-Commerce

Aug 2023 - Jun 2024

Working as a Java Developer at 99designs, contributing to building and maintaining an online marketplace that connects freelance graphic designers with clients, ensuring a seamless workflow for design projects.

Roles and Responsiblities

- Develop scalable backend services using Java (Spring Boot) and design user-facing features with Angular and React.js.
- Integrate PostgreSQL and MySQL databases for managing user, design, and transactional data.

- Collaborate with frontend developers to ensure seamless integration and with designers to follow UI/UX principles.
- Optimize code for performance, speed, and scalability, including caching and query optimizations.
- Implement secure, scalable RESTful APIs with Spring Boot for frontend-backend communication.
- Use Git for version control, manage feature branches, and perform code reviews with Gitflow.
- Troubleshoot and debug issues across the application stack, writing unit and integration tests.
- Participate in architectural discussions and contribute to system improvements.
- Ensure the system is modular, reusable, and easy to extend.
- Engage in Agile ceremonies and collaborate with product managers to prioritize and deliver features on time.

Chubb Limited | Insurance

Nov 2022 - Sep 2023

Chubb Limited is a leading global insurance company, providing comprehensive insurance solutions across commercial, personal, and specialty lines. As part of a team responsible for enhancing their core insurance platform, I worked on a project aimed at modernizing and optimizing the system for improved scalability, performance, and security.

Roles and Responsiblities

- Migrated legacy code to modern Spring Boot framework, enhancing performance and scalability.
- Developed, tested, and maintained Java-based backend code, aligning with business requirements.
- Optimized system performance by addressing database query bottlenecks, backend services, and API calls.
- Implemented security best practices, including authentication, authorization, and encryption, in compliance with industry standards.
- Collaborated with front-end and back-end developers, using Git for version control and integration.
- Wrote unit and integration tests using JUnit and Mockito to ensure code reliability.
- Participated in debugging and resolving issues reported by QA or through production monitoring.
- Contributed to peer code reviews, providing feedback and adhering to coding standards.
- Actively participated in Agile Scrum ceremonies to ensure timely feature delivery and process improvement.
- Documented code and system changes for clarity, aiding future reference and understanding by both developers and business stakeholders.
